

|| OPTICAL PRODUCTION TRAINEE

Job Description

We are looking to give the opportunity to a candidate who ideally is local the chance to start a career in optical production working as a member of a small team. If you are interested in a hands-on role that will you test you mentally, we might have the position for you. In the production of precision optical components there are many disciplines that you will have the opportunity to learn and experience so an interest in learning will be important.

- Taught how to machine and prepare the glass blanks ready for production
- Taught how to use optical measurement equipment that is vital in producing high precision optical components
- Use of CNC glass saws for glass blank production
- Being taught how to operate the optical CNC generator and polisher for lenses.
- Being taught how to handle and inspect optics to meet production standards
- Being taught how to center and final edge optics
- Working as part of a team with good communication skills
- Working to tight deadlines and tolerances
- Ability and willingness to learn
- Prior interest in mechanics would be beneficial
- A good understanding of math's such as using trigonometry would be beneficial
- Good eyesight is important with a fine eye for detail

If interested, please get in touch and send you CV to info@kingsviewoptical.com
